Event Manager

What is EventManager?

EventManagers helps, you as a manager and all the team members, to keep track of everthing you need to know about your team.

The complete game & training schedule are easily added to the teams calendar so everyone know when and where to show up. Members are able to notify if they are able to come to the event or not and are also reminded (via mail) good time before its due.

Check sample team, "Landslaget", to see how a team page may look like.

Landslaget

Features

EventManager is filled with smart features that makes your life, as a team member, easier.

Here follows some of the suppored features. More will come in future updates.

- **Team schedule to keep track of events and participation**
